AI agents and the human review point

82% say they can keep their AI agents in check. Only 5% can back it up.

82%

say they can keep pace

5% *have the controls in place*

swipe →

Where this comes from

Research by OutSystems with CIO Dive and KPMG, released 16 October 2026. 858 executives.

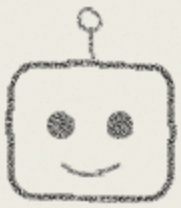

The 5% have all three:

- ✓ automated controls
- ✓ audit trails
- ✓ formal human review

Confidence is high. Controls are rare.

My small AI team

Built in Paperclip with Claude Code, for my LinkedIn.
They never post, like or comment.

research + draft

I review
every draft

I post
by hand

The review already paid off

It read well. It was wrong.

I caught it at review, and it is now a team rule.

Nothing irreversible happened, because the agents only draft.

Not a safety add on. The whole setup hangs off it.

Where is your human review point, and what has it caught so far?

Tell me in the comments.
